Dear Mr. Radi,

We are following your case in the struggle for dignity, human rights and justice with great attention and with a heavy heart we learned about the great injustice that was and is still being put on you by the ruthless Moroccan regime.

Not only the fact that this regime has time and time again shown that it does not care even an atom's weight about the Moroccan people nor those in Morocco nor those living and working abroad but by arresting people such as yourself it shows a limitless disdain for basic human rights and for the freedom of speech.

The baseless allegations that have been put forward in your case as well as in the cases of multiple other innocent people are a lamentable sign of the failure of this cruel regime and that what is claimed to be an independent judicial system but what is in fact merely an instrument that serves the regime and those in power. The mere fact that this regime has allied with a Zionist party in order to obtain and put to use eavesdropping equipment shows that this regime is a nefarious one.

Everyone who cares about dignity, basic human rights and more than that everyone who cares about Morocco and has the desire to see Morocco become a truly independent and progressive country will hold you and all those imprisoned before you and those who will be imprisoned in the future in high esteem.

Being imprisoned in Morocco on baseless allegations and being punished for taking part in the ongoing struggle for human rights is to be considered a badge of honour that is far more precious than any Royal award.

We wish you well, thank you sincerely for your heroic stand and we pray to the Almighty that He will provide true and unquestionable justice.

Yours sincerely,

A. Jaafar
